EXPERIENCE

Way Tech | Feb 2024 - Present

Fullstack Developer

PHP, Laravel, Javascript, JQuery, MySql, Sql Server, Node-RED
Lima, Perú

- Development of services and modules, utilizing good practices of component-oriented programming both in Frontend and Backend using technologies such as PHP, Laravel, JavaScript, JQuery, ReactJs, Typescript.
- Analysis and design of applications and development of diagrams including deployment, components, and architecture, as well as the creation of Technical Documentation for References and reports in general.
- Management and administration of Relational Databases such as MySQL, SQL Server and creation of Stored Procedures for consumption of general services

Fenacrep | Jul 2020 - Dic 2023

Fullstack Developer

PHP, Laravel, Livewire, Javascript, VueJs, MySql, TailwindCss.
Lima, Perú

- I developed comprehensive websites using the Laravel framework for backend, Livewire for frontend, and MySQL for databases.
- I integrated external websites with the databases of the SaaS platform to provide accessibility to relevant information for affiliated cooperatives.
- I modeled databases, designed prototypes, and developed code to ensure optimal usability, preparing pre-production environments and comprehensive documentation to provide an outstanding user experience.

Instituto Pacifico S.A.C | Apr 2018 - Jun 2020

Fullstack Developer

PHP, Laravel, Javascript, JQuery, VueJs, MySql, Bootstrap.
Lima, Perú

- Converted user interface mockups provided by the design team into functional code for production pages, using Laravel for the BackEnd, jQuery, Vue.js, and Bootstrap for the FrontEnd, and MySQL as the database, with version control in Git.
- Provided support to the company's APIs to supply required information to the FrontEnd pages.
